

---

We started in January of 2019

So far, we have not paid anything but our credit has been affected by the mortgage approval.

Not yet

We are trying to move so that our 13 year old can get away from bullies at her school. As of 4/30, just a few days after we found out that we now have to save up more due to the Chenoa fund being cut, she was hospitalized with self-harm and a potential suicide attempt. I know we haven't had financial damages but this has hugely affected our family. We need to get her to a new home so she can have space to herself and so she can find healthy friends at a new school.
